---

Seeking an opportunity as a Full Stack Developer or Software Development Engineer in Test.

### Professional Summary

Full Stack Developer & SDET with over 10 years of expertise in software development and quality assurance. Extensive experience in creating and executing comprehensive test suites, CI/CD pipelines, and agile processes to deliver high-quality software solutions. Proficient in Java, Selenium, and BDD frameworks, along with a wide array of programming languages. Known for strong problem-solving skills, strategic thinking, and effective cross-team collaboration, resulting in optimized development workflows and scalable systems.

### Education

#### Coding Boot Camp Certification

*University of Minnesota, Minneapolis, MN*

#### Associate of Applied Science in Computer Science

*Associates in Applied Science in Foundations of Engineering*

GPA: 3.5

Normandale College – Bloomington, MN

- Tutored Math, Physics, Computer Science
- Math club president
- SQL Certification

#### Associate of Computer Software Technology

*ITT Technical Institute, Eden Prairie, MN*

#### High School Diploma

Edina High School – Edina, MN

### Core Competencies

- **Languages:** Java, Python, JavaScript, SQL, C, C++
- **Database Technologies:** SQL, MongoDB, PostgreSQL, GraphQL
- **Testing & Automation:** Selenium, Cucumber, Appium, TestComplete
- **CI/CD & DevOps:** Jenkins, Maven, Bamboo, Git, Docker
- **Tools & Platforms:** JIRA, TestRail, GitHub, VirtualBox, RS-232
- **Methodologies:** Agile, SDLC, BDD, TDD

## PROFESSIONAL EXPERIENCE

### Senior Software Engineer

*Wells Fargo, Minneapolis, MN*

*August 2021 – April 2024*

- Developed and executed integration and regression testing scripts using Java, Selenium, and BDD (Cucumber) for Wells Fargo's brokerage platform.
- Built CI/CD pipelines with Jenkins and Maven, reducing manual testing time by 30%.
- Collaborated with cross-functional teams to troubleshoot defects, enhancing application stability.

### Software Test Engineer

*Wells Fargo, Minneapolis, MN*

*March 2020 – August 2021*

- Created BDD automation scripts in Java and Selenium for the CORE mortgage tool.
- Conducted end-to-end testing with continuous integration to validate loan processing accuracy.
- Executed test cases using Application Lifecycle Management tools, helping identify critical bugs in product pricing.

### Senior Software Technician

*Stratasys, Eden Prairie, MN*

*September 2017 – December 2019*

- Led the setup and integration of TestRail and JIRA for test case and automation management.
- Automated test cases for industrial 3D printers using JavaScript and Python, increasing testing efficiency by 40%.
- Trained interns and new hires in automation tools and test case writing, receiving a company Spark Award for exemplary performance.

### Software Technician

*Rockwell Collins, Cedar Rapids, IA*

*January 2017 – August 2017*

- Designed and tested critical flight systems for the aviation industry in an Agile environment.
- Developed automation scripts in Python and set up CI pipelines in Bamboo to automate testing workflows.
- Supported systems engineers with bus development and testing for proprietary aviation software.

### Software Quality Assurance Technician

*Carestream, Oakdale, MN*

*May 2015 – November 2015*

- Tested radiology printers, adhering to FDA regulations for quality control.
- Set up servers for printer interface and conducted verification testing, ensuring imaging systems met quality standards.

### Software Test Engineer

*Xirgo Technologies Inc, Edina, MN*

*September 2014 – March 2015*

- Developed regression test scripts in C, utilizing Windows libraries for serial connection setup and data parsing.
- Created test cases based on device manuals and generated HTML reports with timestamps for each test case.
- Conducted positive and negative test case analysis, ensuring robust test coverage and accurate device functionality.
